

**Job Title:** Junior Java UI Developer  
**Req #:** T-00105  
**Level:** Junior

## COMPANY PROFILE

NikSoft Systems Corporation is a recognized Information Technology solutions provider. Founded in 1998 and based in Reston, Virginia, NikSoft is a CMMI Level 3 Certified company with an established reputation for excellence and on-time delivery with a consistently high customer satisfaction rating from its Federal Government and private consulting contracts.

## JOB DESCRIPTION

NikSoft is searching for a full-time **Java UI Developer** to join our fast growing team of Information Technology professionals supporting the Department of Homeland Security's Customs & Border Protection (CBP) program, in **Alexandria, VA**.

### Duties:

- Working closely with the Lead Architect and back end developers, the Junior UI Java Developer will participate in the system architecture design, systems engineering, development, integration testing and validation, and all aspects of the software life-cycle (requirements to design to implementation to test) for a browser based application implemented using Java and backend web services.
- The candidate will be responsible for developing and testing Java code as dictated by project requirement and working with/mentoring junior team members.
- The selected candidate will support project planning, estimating, and reporting.
- The candidate will coordinate tasks, ensuring that milestones are achieved, working with team members, and supporting meeting briefings.
- The ideal candidate will use existing methods and best practices to develop new techniques to create features and capabilities with high levels of usability, reliability, efficiency, and scalability.

### Requirements:

- BS Degree in Computer Science or Engineering and **5+ years of software development** experience including designing, programming, and documenting large-scale software systems on Windows and Unix/Linux
- **Minimum 3+ years of Java user-interface application development experience**
- Demonstrated experience with Java, Java Frameworks (JSF, SpringMVC, etc.), Object-Oriented Design, and Java Application Servers such as WebLogic or WebSphere, and relational databases such as Oracle or DB2
- Strong knowledge of interface development and experience with HTML5, JavaScript, CSS, and AJAX/MVC
- Demonstrated experience in software engineering practices (e.g., reading/generating software specs, design patterns, continuous integration)

- First-hand experience working with medium to large project teams (working with the Federal Government a strong plus)
- Demonstrated ability to think critically and creatively to develop innovative solutions to software problems
- Service Oriented Architecture design and development experience a plus
- Agile development experience a plus
- Code (preferably Java but will accept any language) and writing samples may be requested
- Agile Experience or Training a plus

### **Requisites:**

- Clearance – Must pass CBP BI. Must have a DoD Secret or be eligible to obtain one.
- Must be a US Citizen

### **BENEFITS**

- NikSoft's competitive benefits program includes comprehensive medical and dental care, 401K, paid time off, flexible spending accounts, disability coverage, and other benefits that help provide financial protection for you and your family.
- NikSoft is an Affirmative Action/Equal Opportunity Employer and supports diversity in the workplace. Applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, age, disability, veteran status, marital status, or sexual orientation.
